DETAILED ACTION

1. This Office Action is in response to interview conducted on June 8, 2004. Claims 17-28, 38, and 39 are currently pending and are under examination.

Withdrawal of Objections and Rejections

2. The objection of claims 18, 20-28, and 39 are withdrawn. Claim 39 is a proper dependent claim of claim 38.

Double Patenting

3. The provisional obviousness-type double patenting rejection of claims 17, 19, 38, and 39 are withdrawn. The rejection is withdrawn because this is the only rejection remaining in the current application. The current application also has an earlier priority date. As cited in the MPEP 804 at pages 800-819 (August 2001):

The "provisional" double patenting rejection should continue to be made by the examiner in each application as long as there are conflicting claims in more than one application unless that "provisional" double patenting rejection is the only rejection remaining in one of the applications. If the "provisional" double patenting rejection in one application is the only rejection remaining in that application, the examiner should then withdraw that rejection and permit the application to issue as a patent, thereby converting the "provisional" double patenting rejection in the other application(s) into a double patenting rejection at the time the one application issues as a patent.

Allowable Subject Matter

4. The following is an examiner's statement of reasons for allowance: Claims 17-28, 38, and 39 are allowable. The prior art of record does not teach the disclosed isolated hypersensitive response eliciting polypeptide, compositions comprising the polypeptide, or methods of imparting disease resistance to a plant, of enhancing plant growth, and of insect control for plants using the polypeptide.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
